Terminal Disclaimer

1. The terminal disclaimer filed on 02 December 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 5,864,623 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

2. Claims 51-76 are allowed over the prior art of record.
3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is U.S. Patent No. 4,995,081 to Leighton et al, U.S. Patent No. 5,722,526 to Sharrard or "Best Practices Recommendations for the use of Magnetic Stripes, American Association of Motor Vehicle Administrators (AAMVA).

Leighton et al discloses a method and system for personal identification that uses any of a number of "proofs of legitimacy" to generate and verify a personal identification card including age verification cards.

AAMVA discloses best practices for using magnetic stripes on drivers license/identification cards. AAMVA particularly discloses the process for reading machine readable information stored on the magnetic stripe to determine identifiers corresponding to a particular issuing jurisdiction and to increase the use and sharability of the data that is represented in the license/identification.

Sharrard discloses a system for vending controlled products based on the age of the customer and further disclose reading birth date information from a magnetic stripe of a driver's license and comparing this information with a predetermined value to determine if the user is of legal age.

As per Claims 51 and 64, the closest prior art of record when taken either individually or in combination with other prior art of record fails to teach or suggest extracting date of birth and expiration date information from the machine readable information on a drivers license based on an organizational format corresponding to an issuing jurisdiction identifier and displaying at least a calculated age in response to a successful check for conformance and, alternatively, to indicate an unsuccessful check for conformance. Claims 52-63 and 65-76 are dependent upon claims 51 and 64, respectively, and thus have all the limitations of claims 51 and 64, respectively, and are allowable for that reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
